

PRODUCT LIST FOR BUILDING MATERIAL

Product Name	Specification
Calcium Formate powder	Purity:98%min
β -naphthalene sulfonate formaldehyde condensation	Water Reduction:14%min Water Penetration:90%max Solid content:91%min
Polycarboxylate based superplasticizer	Concrete Water Reduction ratio :28%min
Melamine formaldehyde resin superplasticizer	Concrete Water Reduction ratio :14%min
Color cement brightener	Water Content:5% max
Gypsum Retarder	Water content<3%
Polycarboxylate based superplasticizer solution	Solid content(powder):40.0 \pm 0.5% Concrete water reduction:25%min
Mortars Superplasticizer	Concrete water reduction:28%min
Polyether type defoamer	Water content:<3%
Naphthalenesulfonic acid polymer with formaldehyde sodium salt (dispersing agent MF)	Dispersion:98min
